

Kensol 15

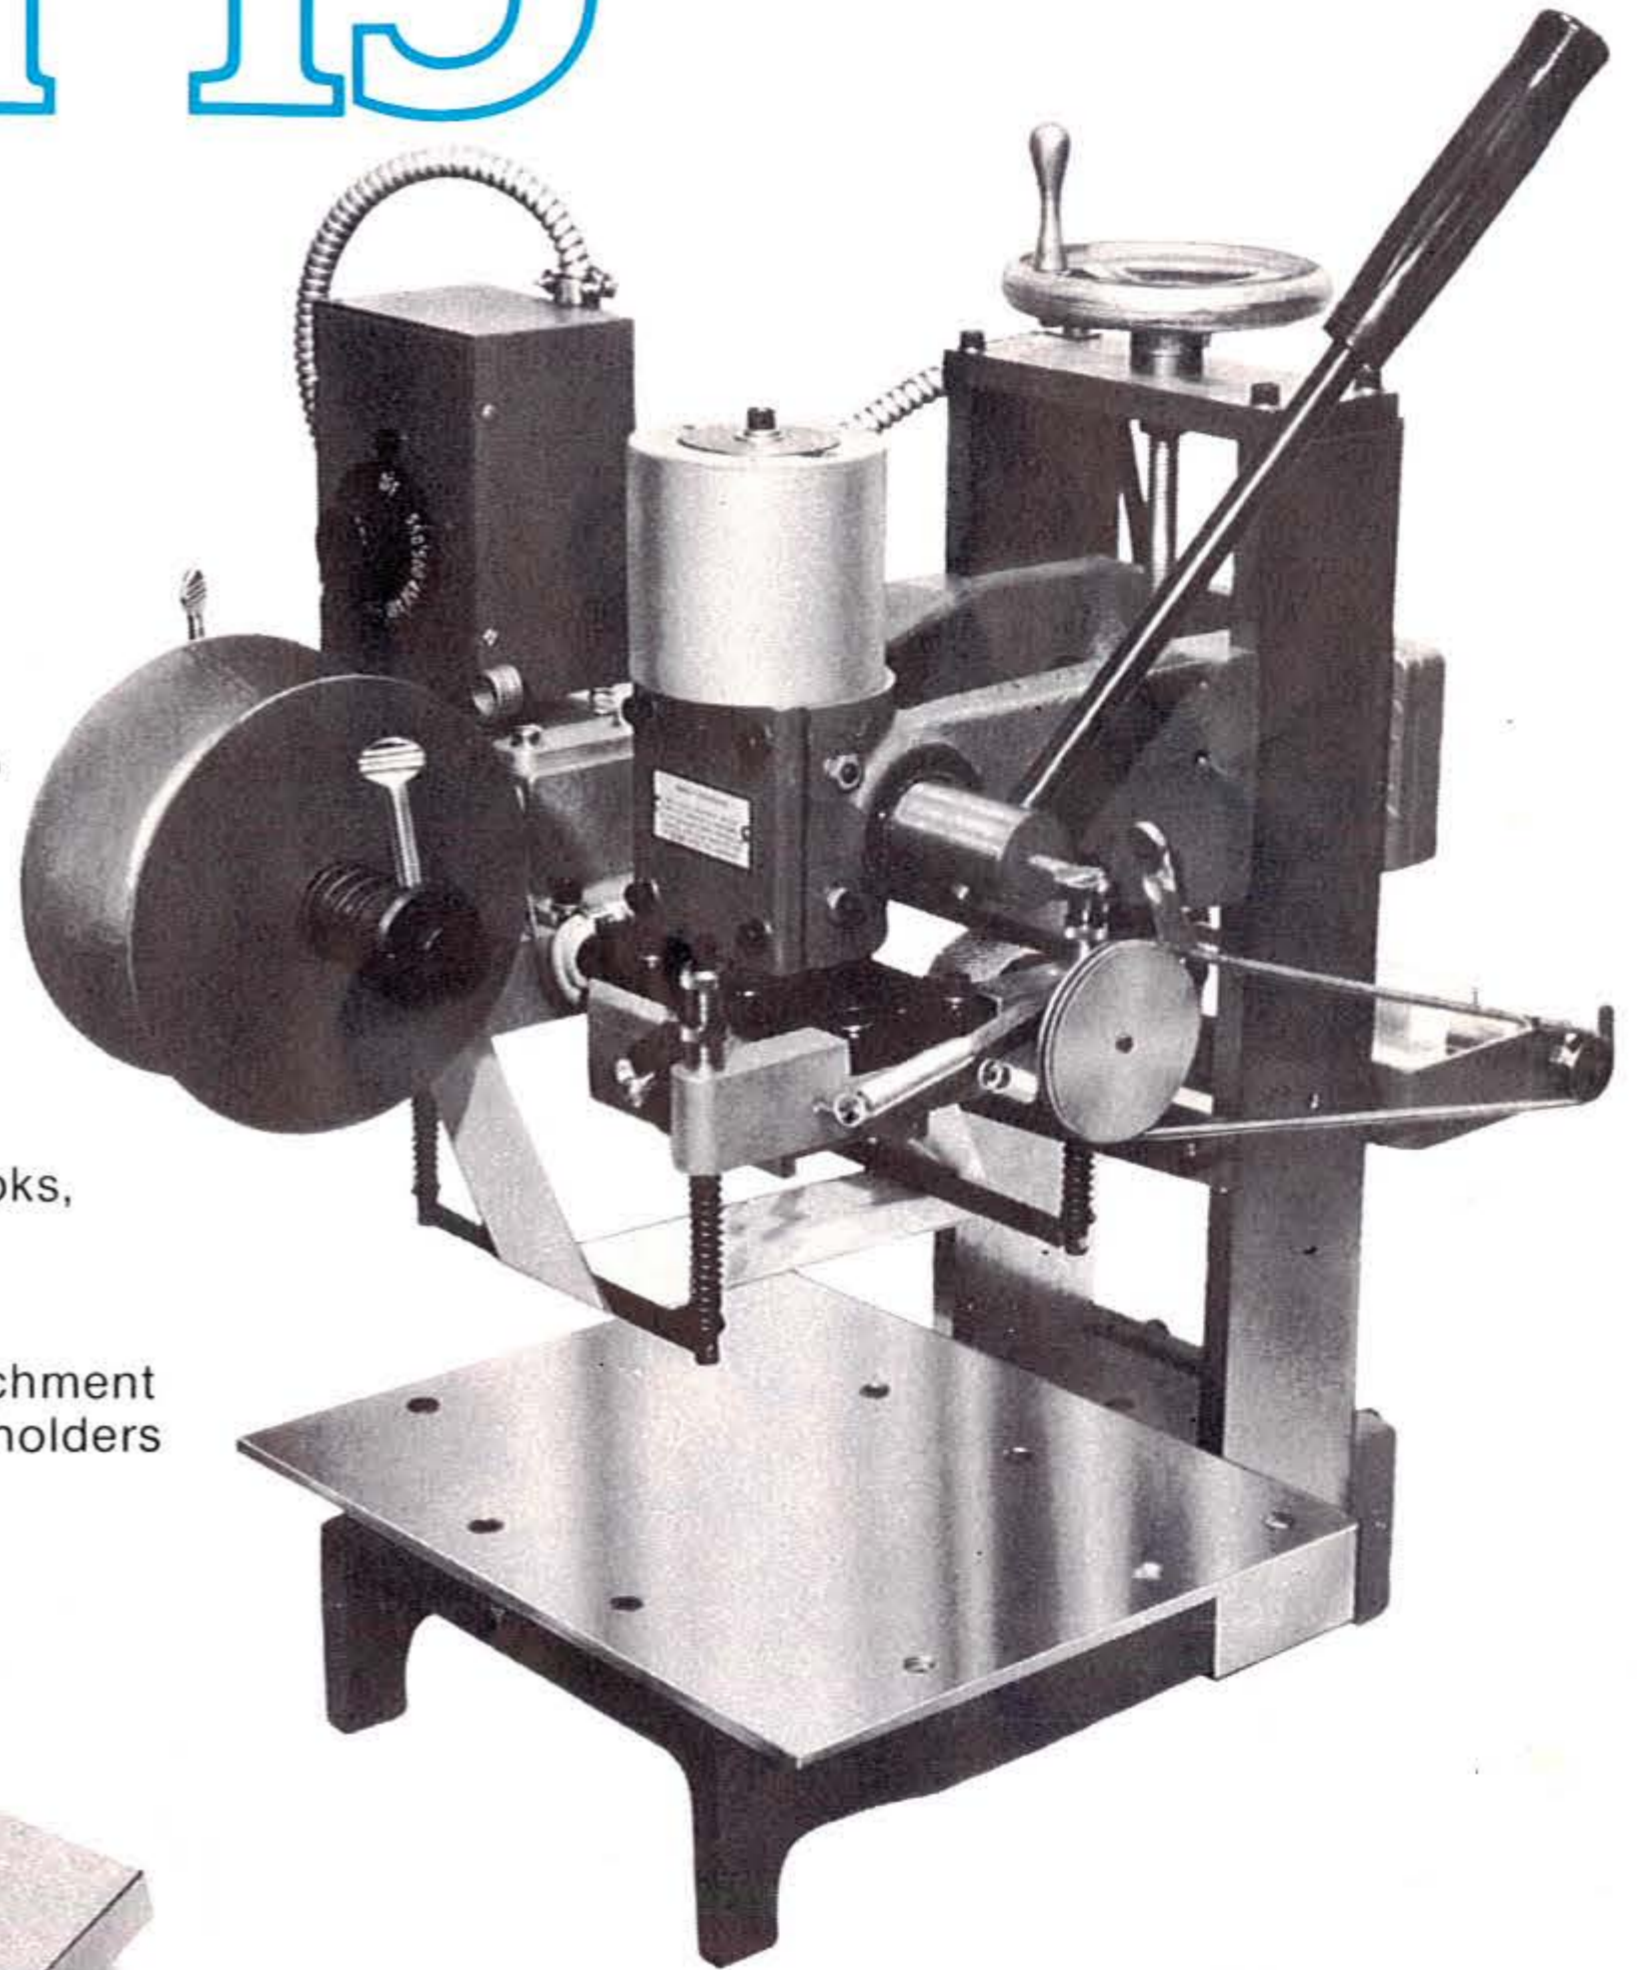

1/2 TON HAND OPERATED ROLL LEAF STAMPING PRESS

This well-made sturdy press can hot stamp up to 1000 quality imprints per hour on plastic, leather, paper, cloth, wood, etc. The Kensol 15 can be adjusted to accept items paper thin up to 6 inches high.

Nests, jigs and fixtures for pencils, napkins, match books, stir rods, etc. are available.

Available with a 2" x 4" or 2" x 6" impression area.

Standard equipment includes an automatic roll leaf attachment with rewind for advancing roll leaf. Various type and die holders as shown in insert photos are also available.

TYPE AND DIE HOLDERS

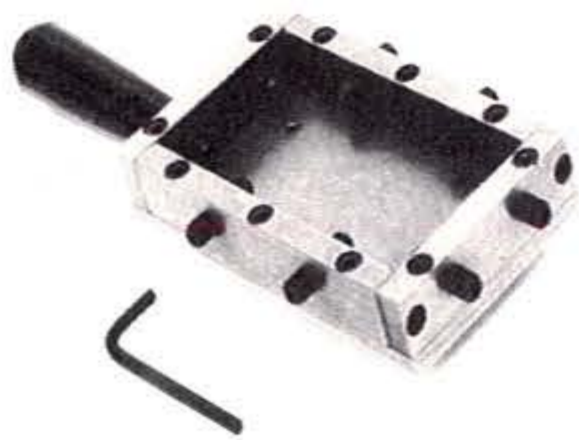

HEAD SLIDE

The Head Slide is an accurate, surface ground steel dovetailed plate sized to fit into the heated head of the press. It is recommended for mounting dies higher than 1/2 inch. Dies are normally mounted with screws.

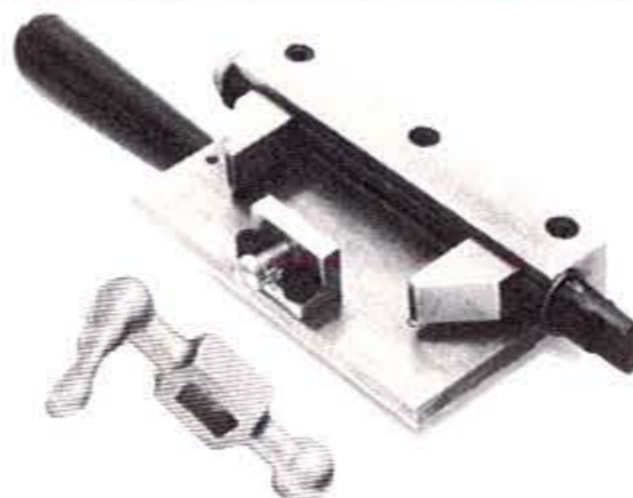

HOT PLATE CHASE

The Hot Plate Chase consists of a 1/2 inch thick ground steel plate mounted onto a dovetail plate with handle. It is recommended for mounting flat metal or silicone rubber dies (under 1/2 inch thick). Dies are fastened with screws or Kensol die bonding film.

FOUR WALL LOCK-UP CHASE

This is a typical printer's box chase consisting of four steel walls mounted on a back-up plate and dovetail plate. Loose type, slugs and type high dies are locked in place using the series of screws protruding thru the side walls.

SELF-CENTERING PALLET

Both jaws travel in or out equally when the removable crank is turned. The pallet quickly locks up and centers one or more lines of loose type, slugs or type high dies. This quick change unit is recommended for short runs with many type changes.

SPECIFICATIONS:

	DIRECTION OF AUTOMATIC
IMPRESSION AREA	ROLL LEAF PULL
2 x 4 Inches	Front to Back (Mechanical Pull)
2 x 6 Inches	Front to Back (Mechanical Pull)
HEAD STROKE:	1 3/4 Inches
